Aufgabe 1a)

Observer Pattern Szenario (Aufgabe 10.1a)

1b)

Siehe code

https://github.com/adamalazzawi/ise25-26_assignment10

output:

Value of subject updated to 5

Sending update to observers...

Observer 1 received update from subject: New value is 5

Observer 2 received update from subject: New value is 5

Value of subject updated to 1

Sending update to observers...

Observer 2 received update from subject: New value is 1

Value of subject updated to 3

Sending update to

Aufgabe 2

a)

Methode `fr`:

```
public static boolean fr(int o, int h) {  
    boolean es = true;  
    if (o > 5 && h >= 3) {  
        es = false;  
    }  
    if (h < 3 && o < 5) {  
        es = false;  
    }  
    return es;  
}
```

Operatoren (Befehle/Symbole)

Operator	Vorkommen
public static boolean fr(...) (Methodendeklaration)	1
int, boolean (Datentypen)	3
= (Zuweisung)	3
if (Bedingung)	2
>, >=, <, < (Vergleiche)	4
&& (Logisches UND)	2
{ } (Blöcke)	3
return	1
;	4

Operanden (Variablen/Konstanten)

Operand	Vorkommen
o	3
h	3
es	4
true	1
false	2
5	2
3	2
